AND FACSIMILE AT 612-486-1398

Chumbo Corporation
221 North First Street
Minneapolis, Minnesota 55401

Re: File No. EB-07-SE-077

Dear Sir or Madam:

This is an official **CITATION**, issued pursuant to Section 503(b)(5) of the Communications Act of 1934, as amended ("Act"), 47 U.S.C. § 503(b)(5), for marketing in the United States a police radar jamming device manufactured by Rocky Mountain Radar ("RMR"), specifically, the RMR-C450 device, in violation of Section 302(b) of the Act, 47 U.S.C. § 302a(b), and Sections 2.803, 15.205 and 15.209 of the Commission's Rules ("Rules"), 47 C.F.R. §§ 2.803, 15.205 and 15.209. As explained below, future violations of the Commission's rules in this regard may subject your company to monetary forfeitures.

On February 22, 2007, the Spectrum Enforcement Division ("Division") of the Enforcement Bureau received a complaint alleging that Chumbo.com is marketing the RMR-S201 and the RMR-C450 devices. On April 2, 2007, the Division staff visited Chumbo.com's internet web site at www.Chumbo.com and observed that Chumbo.com is marketing the RMR-C450 device. The Division staff observed that Chumbo.com was not marketing the RMR-S201 device at that time. The Division staff also observed that Chumbo Corporation is doing business as Chumbo.com.

On January 31, 2007, the Division issued a Notice of Apparent Liability for Forfeiture ("NAL") proposing a \$25,000 forfeiture against RMR for marketing the RMR-C450 device¹ in apparent willful and repeated violation of Section 302(b) of the Act and Sections 2.803, 15.205 and 15.209 of the Rules.² In the NAL, we noted that the Commission's Office of Engineering and Technology ("OET") Laboratory had obtained a sample of the RMR-C450 device directly from RMR for testing.³ Testing of the sample indicated that the unit is designed to emit a signal that intentionally interferes with a licensed radio service (police radar), and is indeed capable of interfering with police radar.⁴ Therefore, the OET Laboratory concluded that the device is an intentional radiator, as described in Section 15.3(o) of the Rules, 47 C.F.R.

¹ The NAL also included the RMR-S201 device which is not relevant to this Citation.

² *Rocky Mountain Radar*, Notice of Apparent Liability for Forfeiture, 22 FCC Rcd 1334 (Enf. Bur., Spectrum Enf. Div., 2007) ("RMR").

³ *Id.* at 1335.

⁴ *Id.*

§ 15.3(o).⁵ In addition, the OET Laboratory's tests indicated that the RMR-C450 device produced a radiated emission at 11.23 GHz, a restricted frequency band listed in Section 15.205 of the Rules, 47 C.F.R. § 15.205, and that this radiated emission substantially exceeds the radiated emission limits for intentional radiators specified in Section 15.209 of the Rules, 47 C.F.R. § 15.209.⁶ The OET Laboratory also concluded that the RMR-C450 device was improperly certified.⁷ In this regard, the OET Laboratory noted that the grant of certification issued for the RMR-C450 device indicates that the device was tested as an "unintentional radiator."⁸ As explained above, however, the OET Laboratory found that the device is an intentional radiator.

Section 302(b) of the Act provides that "[n]o person shall manufacture, import, sell, offer for sale, or ship devices or home electronic equipment and systems, or use devices, which fail to comply with regulations promulgated pursuant to this section." Section 2.803(a)(1) of the Rules, 47 C.F.R. § 2.803(a)(1), provides that:

no person shall sell or lease, or offer for sale or lease (including advertising for sale or lease), or import, ship, or distribute for the purpose of selling or leasing or offering for sale or lease, any radio frequency device unless ... [i]n the case of a device subject to certification, such device has been authorized by the Commission in accordance with the rules in this chapter and is properly identified and labeled as required by § 2.925 and other relevant sections in this chapter.

Pursuant to Section 15.201 of the Rules, 47 C.F.R. § 15.201, intentional radiators must ordinarily be authorized in accordance with the certification procedure prior to marketing. Section 2.803(g) of the Rules, 47 C.F.R. § 2.803(g), however, provides in pertinent part that:

[R]adio frequency devices that could not be authorized or legally operated under the current rules ... shall not be operated, advertised, displayed, offered for sale or lease, sold or leased, or otherwise marketed absent a license issued under part 5 of this chapter or a special temporary authorization issued by the Commission.

Further, Section 333 of the Act, 47 U.S.C. § 333, prohibits any person from willfully or maliciously interfering with or causing interference to any radio communications of any station licensed or authorized by the Commission. Moreover, Section 15.205 of the Rules, 47 C.F.R. § 15.205, prohibits radiated emissions, other than spurious emissions,⁹ in any of the restricted frequency bands listed in that section. Thus, intentional radiators that cannot legally be operated – because, for example, they interfere with or

⁵ *Id.* An intentional radiator is defined by Section 15.3(o) of the Rules, 47 C.F.R. § 15.3(o), as "[a] device that intentionally generates and emits radio frequency energy by radiation or induction."

⁶ *RMR*, 22 FCC Rcd at 1335.

⁷ *Id.* RMR obtained certification for the RMR-C450 under FCC ID No. QKK-C03 by representing to a Telecommunications Certification Body that the device was a radar detector. We note, however, that RMR marketed the device as a radar detector and a radar "scrambler."

⁸ *RMR*, 22 FCC Rcd at 1335. An "unintentional radiator" is defined by Section 15.3(z) of the Rules, 47 C.F.R. § 15.3(z), as:

[a] device that intentionally generates radio frequency energy for use within the device, or that sends radio frequency signals by conduction to associated equipment via connecting wiring, but which is not intended to emit RF energy by radiation or induction.

⁹ Section 2.1(c) of the Rules, 47 C.F.R. § 2.1(c), defines a spurious emission as "[e]mission on a frequency or frequencies which are outside the necessary bandwidth and the level of which may be reduced without affecting the corresponding transmission of information."

jam licensed police radio facilities or operate in restricted frequency bands – are not eligible for a grant of equipment certification. Finally, Section 15.209 of the Rules sets forth the radiated emission limits applicable to intentional radiators.

As noted above, contrary to the claims of RMR, the RMR-C450 device is an intentional radiator. The device is not, however, eligible for a grant of certification because the device's intended purpose is to interfere with Commission authorized radio facilities, specifically, licensed police radar, in violation of Section 333 of the Act, and the OET Laboratory has determined that the device in fact is capable of interfering with police radar.¹⁰ Moreover, there are two additional grounds for finding the marketing of the RMR-C450 device to be unlawful. The RMR-C450 device is not eligible for a grant of certification because it produces a radiated emission in the restricted frequency band at 11.23 GHz in violation of Section 15.205 of the Rules.¹¹ This radiated emission also substantially exceeds the radiated emission limits for intentional radiators specified in Section 15.209 of the Rules.¹²

The record before us indicates that Chumbo.com apparently is and has been marketing the RMR-C450 device. Accordingly, it appears that Chumbo.com has violated Section 302(b) of the Act and Section 2.803 of the Rules by marketing the RMR-C450 device, which is not eligible for a grant of equipment certification because the device is intended to interfere with licensed police radar, in violation of Section 333 of the Act. Chumbo.com has also apparently violated Section 302(b) of the Act and Sections 2.803, 15.205 and 15.209 of the Rules by marketing the RMR-C450 device, which is not eligible for a grant of equipment certification because it produces a radiated emission in the restricted frequency band at 11.23 GHz, and which produces emissions that substantially exceed the radiated emission limits for intentional radiators.

If, after receipt of this citation, Chumbo.com violates the Communications Act or the Commission's rules in any manner described herein, the Commission may impose monetary forfeitures not to exceed \$11,000 for each such violation or each day of a continuing violation.¹³

If you choose to do so, you may respond to this citation within 30 days from the date of this letter either through (1) a personal interview at the Commission's Field Office nearest to your place of business, or (2) a written statement. Your response should specify the actions that Chumbo.com is taking to ensure that it does not violate the Commission's rules governing the marketing of intentional radiating jamming devices in the future.

The nearest Commission field office is the St. Paul District Office in St. Paul, Minnesota. Please call Peter Waltonen at 202-418-0097 if you wish to schedule a personal interview. You should schedule any interview to take place within 30 days of the date of this letter. You should send any written statement within 30 days of the date of this letter to:

Kathryn S. Berthot
Chief, Spectrum Enforcement Division
Enforcement Bureau
Federal Communications Commission
445-12th Street, S.W., Rm. 3-C366

¹³ See 47 C.F.R. § 1.80(b)(3).

Under the Privacy Act of 1974, 5 U.S.C. § 552(a)(e)(3), we are informing you that the Commission's staff will use all relevant material information before it, including information that you disclose in your interview or written statement, to determine what, if any, enforcement action is required to ensure your compliance with the Communications Act and the Commission's rules.

The knowing and willful making of any false statement, or the concealment of any material fact, in reply to this citation is punishable by fine or imprisonment under 18 U.S.C. § 1001.

Thank you in advance for your anticipated cooperation.

Sincerely,

Kathryn S. Berthot
Chief, Spectrum Enforcement Division
Enforcement Bureau
